# Israeli Cruise Missiles Fired At Syria Destroyed By US Navy

By: Sorch Faal, and as reported to her Western Subscribers

A new urgent action report prepared by the Ministry of Defense (MoD) for President Putin today states that specialized forces operating the highly advanced Vityaz air defense system in the Southern Military District detected the launching of two Popeye Turbo SLCM ballistic cruise missiles from an Israeli Dolphin-class submarine patrolling in the Eastern Mediterranean whereupon they were “*nearly immediately*” destroyed by a US Navy Arleigh Burke guided missile destroyer operating in the same region.

The Vityaz air defense system guarantees the detection of enemy ballistic and long-range cruise missiles at blastoff and is currently being deployed along the entire Russian border; while the Popeye ballistic cruise missile is the type used by Israel during its Dolphin submarine 5 July attack on an arms depot in the Syrian port city of Latakia that targeted a contingent of 50 Russian-made Yakhont P-800 anti-ship missiles; and the Arleigh Burke class of guided missile destroyers are the United States Navy's first class of destroyer built around the Aegis Combat System and the SPY-1D multi-function phased array radar making them some of the most feared warships in the world.

According to this MoD report, these ballistic cruise missile launches took place at 10:16 am Moscow time (0616 GMT) with the Israelis first denying any knowledge, but subsequently stating that they were conducting missile tests in Mediterranean.

As to the exact method the US Navy utilized in destroying these two ballistic cruise missiles this MoD report does not speculate upon, but a review of an Australian Air Force technical report [Technical Report APA-TR-2007-0402] clearly shows it can be done, but only at great expense and using First-World technical skills and 21<sup>st</sup> Century technology.

With Syrian President Bashar Assad warning that any military strike against his country would spark an uncontrollable regional war and spread “*chaos and extremism*,” this MoD report says, the Israeli motivation for launching these ballistic cruise missiles earlier today remains “*highly suspect*,” a situation made even more dangerous as all International treaties require advanced notification prior to conducting any tests of this type.

This MoD report further states that the launching of these ballistic cruise missiles could have been a test of Russian military capability to detect these types of launches and Kremlin resolve to notify the entire world immediately upon their detection.

In the former the Russian military proved its ability to immediately detect these types of launches, and in the latter the Kremlin, indeed, showed it would not hide from the world any knowledge the West was attacking Syria.

Though not explicitly stated in this MoD report, but speculated upon, Russian defense intelligence experts contributing to it note that Israel may have been attempting to start this war by an unprovoked attack upon Syria that would be blamed on the Americans and whose effect would be the starting of at least a wide-ranging regional war, or at its worst, World War III.

As to why Israel would want to start a major war lies in its *“demographic time bomb”* of a population that is pitting the Jewish states main factions (Zionist-Haredi-Arab) against each other with mounting fears of civil war growing by the day.

With the Haredi religious movement in Israel bound by three oaths, (1) not to settle in Israel by using force or violence, (2) not to make war with other nations and (3) not to act as if the other nations of the world would persecute Israel; and their booming population numbers, these strictest of Jewish sects have aligned themselves with Israeli Arabs and who both now control over 30% of the population.

To the reason(s) as to why Syria is now the main target of this war lies mainly in the machinations of Saudi Arabia, especially their current intelligence chief Prince Bandar who last month the Libyan Defense Ministry warned delivered Israeli chemical weapons to Syrian terrorists.

Confirmation of chemical weapons being delivered to Syrian rebels by the Saudis were confirmed by Turkey this past May when seven terrorists from the al-Qaeda-linked Al Nusra Front were captured in antiterrorist operations in Adana, Turkey, and two kilos (4,5 pounds) of sarin gas were found in their apartments.

Further confirmation of Syrian rebels using chemical weapons were detailed by the United Nations whose investigators proved their use against the Syrian army at least 5 times by al-Qaeda-linked terrorists this past year.

Even the latest chemical weapons attack against Syrian civilians has been put squarely at the door of Saudi Arabia, and as we had previously reported on, Syrian rebels in the Damascus suburb of Ghouta admitted to Associated Press journalist Dale Gavlak that they were responsible for the 21 August chemical weapons incident which Western powers have blamed on Bashar Al-Assad's forces, revealing that the casualties were the result of an accident caused by rebels mishandling chemical weapons provided to them by Saudi Arabia.

*“From numerous interviews with doctors, Ghouta residents, rebel fighters and their families....many believe that certain rebels received chemical weapons via the Saudi intelligence chief, Prince Bandar bin Sultan, and were responsible for carrying out the (deadly) gas attack,”* writes Gavlak.

Even though all of the major US mainstream propaganda media organs are still refusing to tell the American people the truth about what happened in Ghouta, the same cannot be said of the respected Fairness & Accuracy In Reporting (FAIR) organization who when analyzing the Obama regimes evidence for war against Syria against the Associated Press report written by Gavlak, found the latter to be more credible.
